Independent Insurance Agency Since 1950

Ames Insurance is an independent agency. Markets change. Prices change. Our independence allows us to offer rate quotes from multiple companies and move our existing customers from one company to another when the time is right. Captive agencies like State Farm, and direct companies like GEICO or Progressive Direct can't do that - they only have one company to choose from. Call Ames Insurance and let us do the research for you - the first, time, and every time!

Ames Insurance Agency Writes All Kinds of Insurance

Auto - Motorcycle - ATV - Snowmobile - Motorhome - Boat - Travel Trailer - Jet Ski

Homeowner - Renters - Landlord - Umbrella

This Week at Cooper's

Hours This Week:

Friday 2:00pm through Thunder In The Streets
Saturday Closed

It looks like downtown Jamestown is back to "normal," and all of the Lucy-Desi fans left by Tuesday. (I put this in quotes as there isn't much normal about downtown Jamestown!) It was great to have the tourists around, but we're enjoying a slower pace now at the shop. We really don't have the staff (or the kitchen) for that kind of crowd.

Chili is back! We took it off the menu for a few weeks, as it wasn't selling, but suddenly everyone was looking for chili or chili dogs. So we made another batch and it's back on the board and the reviews are good. (I asked one man's wife if he actually licked the bowl, it was so clean of chili!) You'll see we have the soup list below as well.

The second biggest event of the year for Cooper's is coming up this Friday – Thunder in the Streets. There will be cars of all makes and models all over downtown for your viewing pleasure, starting at 5 pm. And Cooper's is right in the middle of it! But, it's the day before our daughter Becky's wedding. Something about a rehearsal dinner that we have to attend. (I was threatened with being disowned if I didn't attend.) So, we need to change our hours a little bit. We'll be opening later (2 pm) but staying open later (till the fans are gone). And then we'll be closed on Saturday for the wedding as there really won't be anyone to work. Then on Sunday – some well deserved rest!

As the wedding is at the house, we have to move all of the furniture from the living room and sunroom upstairs; Sally's sister and brother-in-law are up this weekend to help us out. I have no idea how I'm going to be able to watch TV the rest of the week with everything packed up. We have to move the dining room table into the kitchen and the kitchen table into the "mud room." We certainly appreciate their help, but we have no idea how we're going to get everything back down after the wedding!

Fall is coming, I think it's time to consider some menu changes. Periodically, we see what is and is not selling and then make some changes to the menu appropriately. It's been a while and we're running low on to-go menus anyway. (Heads up, Quick Solutions!) So, is there anything specific you would like to see on our new menu?

International week at Cooper's this past week. We had people in from Russia and Germany as well as other European countries. What did they like? Outdoor seating! This is so common in Europe but not seen around here. They felt at home. We also had some great customers looking for gluten free food. One woman had not gone out with her family for FIVE YEARS since she can never find gluten free options. She was so glad to enjoy dinner with her daughter.

Cookies are back! No, we don't make them ourselves, we get them as raw dough and bake them, but they are delicious. (Bakeries that make food from scratch need a LOT bigger kitchen than we have with mixers, deep fryers, huge ovens – think Eckloff where more than half of their building is kitchen.) Stop on by for those or our very popular homemade Hello Dolly Bars (graham cracker crust, coconut, walnuts and chocolate chips)!

Still a lot of comments about the future of Cooper's. Everyone says the same thing, that it would be a shame for Jamestown to lose Cooper's. We couldn't agree more, so it would be great to find someone that wants to work with us to continue Cooper's or take over and provide similar good and fresh foods. We have had recommendations, suggestions and even prayers from our customers. Some of the ideas we've heard are high end pizza (think brick ovens and local brews) and jazz clubs. We have some real interest out there, but nothing specific yet. We'll keep looking!

There likely won't be much of an email next week, as we try to recover from the wedding. But before we forget, we want to thank all of those that help us with the big event. These include Chris

You will probably remember me as "Bill's mom". I visited your cafe in October with my son Bill. Coffee was outstanding--service was great. Can't wait to come back. Will surely stop on my next trip from Arizona.

Gail M.

 We have raised \$7,679.25!

Merchant at Mariner's Pier Express (catering), Jamestown Awning (tent), Taylor Rental (tables, chairs, dinnerware, etc.), Girtons Flowers & Gifts (flowers), Kym Harris (photography) and J&P Cakes (cake).

People assume that if you own a restaurant, you eat at your own place. Well, after dealing with your own food all day and waiting on others, you want something different and to be served. So it's not unusual for us to wait on people from various bars and restaurants and we frequent other restaurants. You get to know each other, which is kind of neat. So we are always looking for new places. We thought we'd been to pretty much all of the places but we only recently realized that the Q had food. They were at the Taste of Jamestown and we had some of their great wings. I was chatting with the owner the other day about his place and now Sally and I can't wait to try them out.

Here's to seeing you at Cooper's!

Have a large group? Call ahead & we'll reserve a table!

So, what is Cooper's? It's quality soups, sandwiches piled high, original salads and fresh baked goods. It's locally roasted coffee and hot and cold espresso drinks. It's a great place to meet friends and family to chat over coffee and biscotti. It's a relaxing place to meet with clients. **It is your WiFi hot spot** to read your email and check out your Facebook page. It's a place to catch up on the latest news playing on our flat screen TV sets. It's a showcase for local artists. It's a community meeting place. It's just a fun place to hang out.

Delivery

Free delivery is available within Downtown Jamestown.

[Click here to place your order online.](#) Please place your order at least one hour ahead.

Let us host your next event...

Looking for a place for your next evening get together? Cooper's is available weekday evenings to host your event. Be it birthday parties, club meetings or client presentations, let us cater it for you in our restaurant. For our catering menu or for further details, please call.

Flex Probe

- Improves Method 5 Sampling
- Dramatic cost savings due to Flex Probe length variations. Length from 2 feet to 20 feet with 1 foot increments.
- Ease of use - filter and impingers remain stationary reducing opportunity for breakage. Makes testing in cold weather easier.
- Versatility - can be used for a multitude of tests including PM, Metals, Dioxins and Gaseous Sampling. Capable of paired train testing.
- Can withstand temperatures of 550°F.
- Allows for vertical sampling.

Providing Environmental Excellence Since 1996

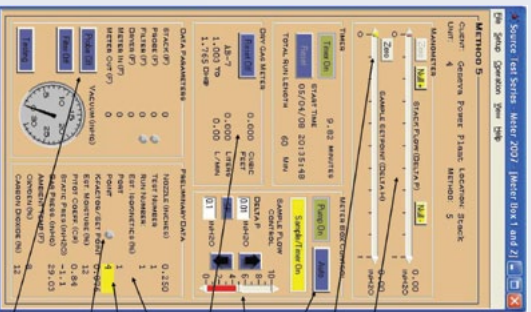

Formed in 1996, Eagle Mountain Scientific, Inc. (EMSI) is a privately held environmental contracting firm. EMSI has experienced consistent growth and has constantly expanded the available services and products to meet the ever changing needs of our customers. With a track record of over 98% customer retention year over year, potential customers will soon realize that EMSI stands behind the statement "The Customer Comes First."

With a primary concentration in air and water monitoring and testing, EMSI offers solutions to stream line testing and monitoring projects. These solutions shorten the completion time of projects as well as reduce the overall associated costs.

Automated Source Sampling

- Regulatory Agency Approved
- Boiler MACT CEMS
- Continuous Data Collection

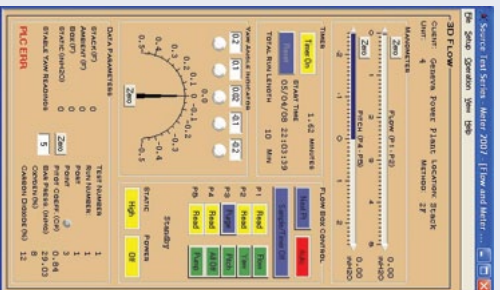

- Flow and Sample Rate
- Set Point Indicator
- Automated Sampling
- Sample Rate Control
- Meter Volume and Rate
- Real Time Isokinetic %
- Port and Point Tracker

FREE ELECTRONICS RECYCLING AT EAGLEZIP.COM

According to the Environmental Protection Agency (EPA), Americans own nearly 3 billion electronic devices. When the electronic device is not wanted anymore, it should be recycled. EagleZip.com is a New York State registered electronics waste collection site.

New York State residents can drop off consumer electronics including computers, monitors, keyboards and mice, printers and scanners, small televisions (under 40 lbs.), VCRs, DVRs, MP3 players, DVD players, cable and satellite boxes, and video games devices and consoles for recycling at 101 West Fourth Street in Jamestown. EagleZip.com will recycle them safely so these electronics do not become hazardous waste in landfills. You can recycle your electronics at EagleZip.com from 10AM to 6PM Monday through Friday. In order to qualify for free recycling you must be a New York State resident, a New York based company with fewer than 50 employees or a New York based non-profit company with fewer than 75 employees.

It is important to recycle your electronics because they contain hazardous elements and compounds including lead, mercury and cadmium which are toxic when released into the environment. The EPA states that of the 2.25 million tons of electronics ready for end-of-life management only 414,000 tons (18 percent) were collected for recycling, while 1.84 million tons (82 percent) were disposed of primarily in landfills.

Please utilize this free recycling service for New York State residents and companies. If you would like more information about EagleZip.com and its services, visit www.eaglezip.com or call 716-661-3183. If you would like further information about electronic recycling visit the Department of Environmental Conservation at www.dec.ny.gov or the Environmental Protection Agency at www.epa.gov.

EagleZip.com makes it EZ for you by offering a variety of services to meet the needs of Western New York and Northwestern Pennsylvania. EagleZip.com is your one stop shop for all your computer, networking, web and marketing needs.
